Perfect Scenario

Animals are
identified unfit or
compromised
before initial

Animals become
unfit or
compromised
during transport

Bad Ventilation

Extreme Weather

No unexpected
events happened

Injured animal
during
transportation

Maximum FWR
interval exceeded

The conveyance
meets all the
requirements like
dispensing

Unscheduled

Only FWR stops
are made during
the transport

Transporter
refused to deliver

Animal requires
further care

Ventilation is
affecting animals

Delivery is
delayed due to
weather

Animals were
FWR'ed within its
MTI

MTI without FWR
of the injured
animal will be
updated to 12

CFIA agent will
release notice of
violation

The transporter is
not required to
provide FWR at
maximum

Transporter
accepted to load
the
unfit/compromised

Animal can be
delivered without
suffering
