**After Log-in Page**

Design #1: First thing user wills see after logging in are the main functions. Driver's profile page will be displayed in other page
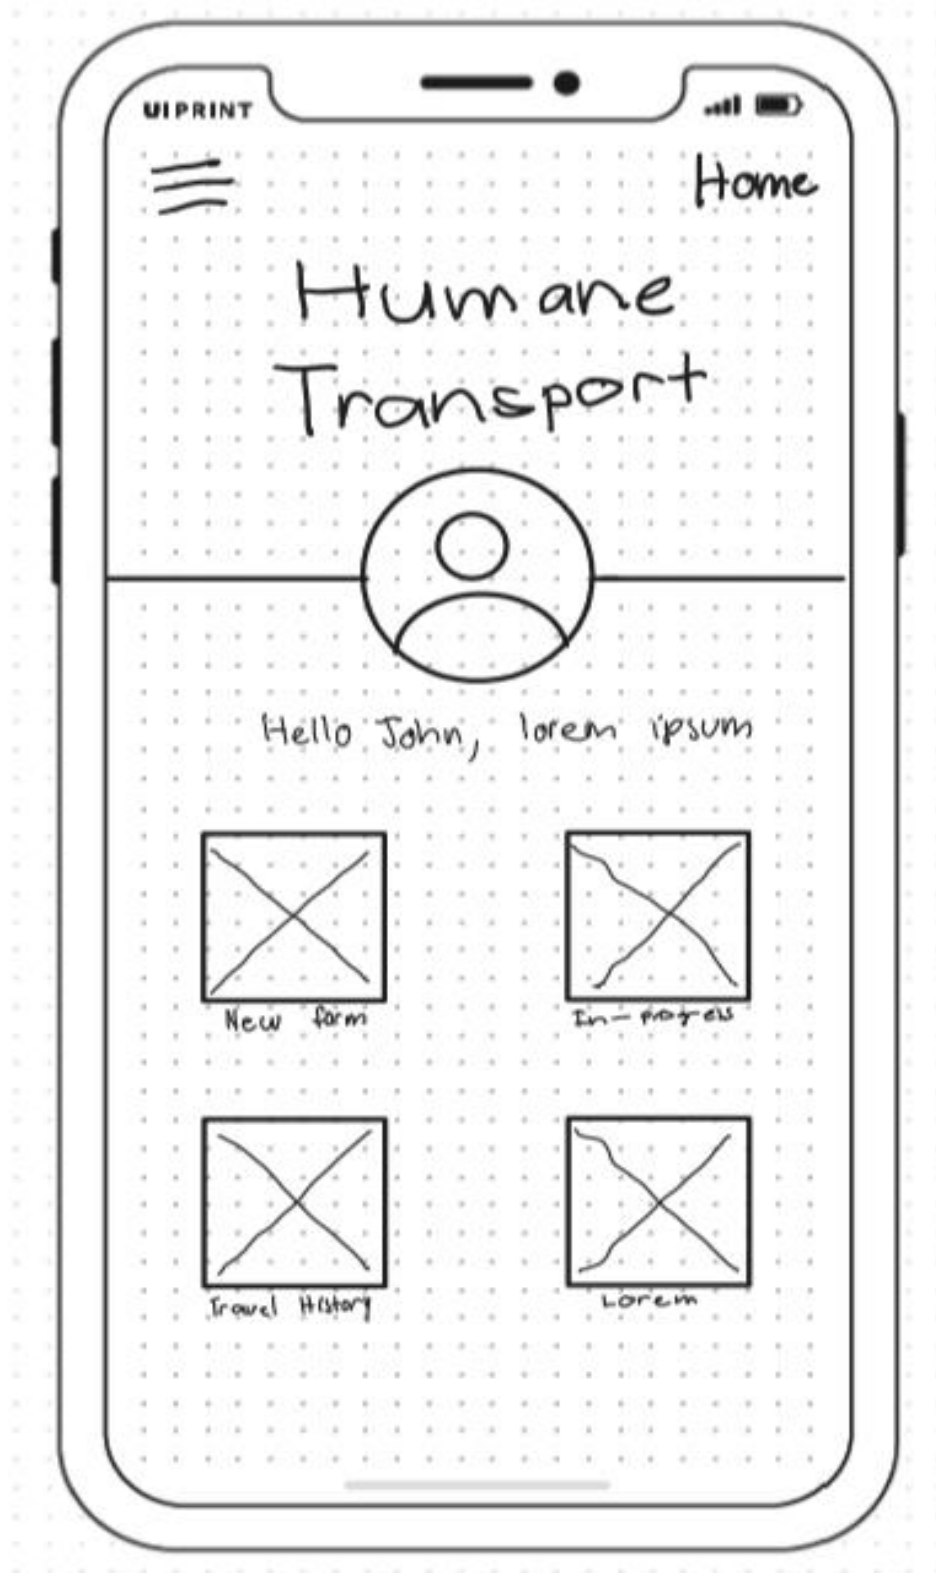

Design #2: Added temperature in this design iteration.

Design #3: Main functions are located at the bottom. Driver's profile will also be displayed right away after logging in.

Design #4: Temperature removed and added "Humane Transport"

Design #5: After logging in, transporter will see previous travel records right away. The button to add new form is located below.
